IDENTIFYING POWER BRAKE UNITS

Air-Pak, Hydrovac, Mini-Pak, Multi-Pak, Multi-Vac Identification: These Units have an Identification Tag attached to them on which is stamped the Part No.

MASTER-VAC IDENTIFICATION: On Atmospheric Suspended Units the Identification Code is stamped on the flange of the vacuum housing.

IMPORTANT: On Vacuum Suspended Units thru and including 1965 Units, the Identification Code is stamped on the Valve Rod. Starting with 1966 Units, an Identification Tag is attached to them on which is stamped the Part No. A code may still be used on the valve rod but it is to identify the component--NOT the assembly.

Power-Vac Identification: The five (5) Bendix Power-Vac Units have no Identification Cod or Tag on them. To identify a Power-Vac Unit or any other Bendix Unit which cannot be Identified by Identification Code No. or Tag, refer to Identification Data Pages in the 9-800 Catalog (Pages 101-113).

Treadle-Vac Identification: Identification Code is stamped on the end of the hydraulic cylinder.
